The information is required by law to help you to understand the nature and the risk of this fund. You are advised to read it so you can make an informed decision about whether to invest. The Internet –pages of the management company contains more information on risks and return.

AIF HCP Focus – Equity fund, EUR share class

ISIN-Code: FI4000048384 The fund is managed by Helsinki Capital Partners Limited (HCP)

Objectives and investment policy

The Fund is an active equity fund. The objective of the Fund is to achieve an investment return that exceeds the return of its benchmark index. The benchmark index of the Fund is Morgan Stanley Capital International (MSCI ACWI IMI) – equity index including dividends. The benchmark index tracks performance of global equity markets. The Fund doesn't follow the benchmark index.

The Fund is open for subscriptions and redemptions quarterly – last bank days of March, June, September and December. Minimum investment is 5'000 euros and subsequent investments 5,000 euros.

The fund follows a so-called value-investing strategy. The fund invests in companies with a market-value that is low compared to its subjective intrinsic value, according to the best estimates of the fund manager.

The investment strategy is not bound by geography not is it bound to certain industries or companies of a certain size.

The investment horizon of the fund is longer than usual; the fund generally invests with the intention to hold the investment for several years.

The portfolio of the fund is more concentrated than usual; the target number of holdings is 8 – 12. The maximum investment in the securities of any one issuer is 20% of the assets of the Fund. The maximum number of such investments is two. The maximum size of the other investments is 10% each of the assets of the Fund. Consequently, the assets of the Fund must be invested in the securities of at least eight (8) different issuers.

The head of risk implements procedures and policies needed to constantly identify, measure, control and monitor all risks relevant to the fund.

This fund may not be appropriate for investors who plan to withdraw their money within a period of 4 years.

This share class does not distribute dividends. Income from investments is reinvested. The fund is denominated in EUR. Investments in this share class settle in EUR.

Risk and Reward Profile

The indicator measures the risk of price fluctuations in the fund certificates based on the last 5 years volatility. The risk indicator has been calculated using monthly return data of the underlying strategy from the last 5 years of operation. The risk indicator places the fund in category 6. This means that the purchase of units in the fund is connected to high risk of such fluctuations. Please note that category 1 does not mean a risk free investment. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the fund, why the category might change in the future.

The following risks are materially relevant to the fund but are not adequately captured by the synthetic indicator and may cause additional loss:

Credit risk: The value of debt securities in the fund may decrease as a result of a default of the issuer.

Liquidity risk: Securities in the fund may be sold below their valuation due to insufficient liquidity in the market.

Counterparty risk: A counterpart may fail paying the proceeds related to the sale of securities by the fund or may fail delivering the securities purchased by the fund.

Strategy risk: The strategy followed by the fund may cause losses to the fund if it fails to perform as intended. The fund expects to hold a very concentrated portfolio of a limited number of securities. Consequently, a steep decline in the value of any one of these investments would cause the fund's overall value to decline to a greater degree than a more diversified fund. The fund may focus its investments in certain regions or industries, thereby further increasing its potential vulnerability to market volatility.

Operational risk: Failures or delays in operational processes may negatively affect the fund.

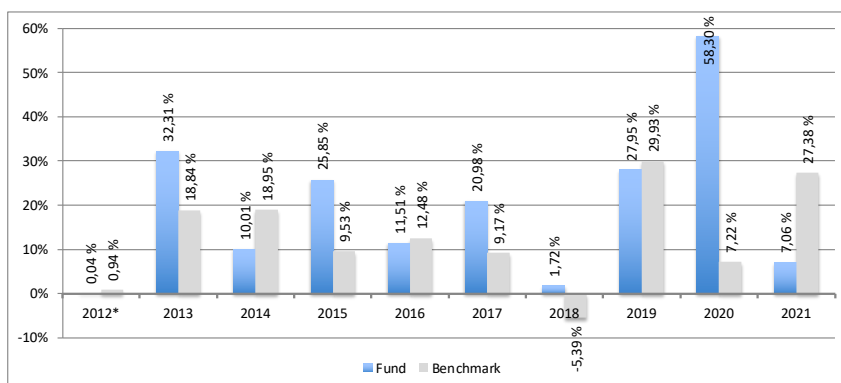

Event risk: Unforeseeable events such as devaluations, political events, etc.

Charges	
One-off charges taken before or after you invest	
Subscription fee (%)	0 %
Redemption fee (%)	0 %
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out respectively	
Charges taken from the fund over a year:	
Ongoing charges (%)	1,15 %
Charges taken from the fund under certain specific conditions:	
Performance fee (%)	realized fee 2021 0,75% (10% of the return exceeding the benchmark, charged on a quarterly basis)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases, you might pay less – you can find this out from your financial advisor or distributor. The above charges figures are maximum figures (as of 2022 the presented figure will be based on charges levied in 2021). This figure may vary from year to year. It excludes performance related fees and transaction costs including third party brokerage fees and bank charges on securities transactions.

Starting from year 2022 Fund's performance fee shall be no more than 10% of the Fund's returns that exceed the returns of the benchmark index. The performance fee is calculated from the return made during the calendar month. The performance fee is paid in arrears monthly and is calculated from the value of the fund unit on the last Finnish banking day of the month after the fixed management fee and the custodian fees have been deducted. When calculating the performance fee, we use a "high water mark" principle: if on the last banking day of the month the value of the fund unit is lower than the fund unit's value on the previous highest historical last banking day of the month, then the performance fee is not charged.

For more information about charges, please see sections 8 and 17 of the Fund's prospectus, which can be found from: <https://www.hcp.fi/en/hcp-focus/>

* Not a full year. Fund was established 30.11.2012

The Fund's starting date is 30.11.2012. The past performance of the share class is calculated NAV to NAV. Historical performance is not indicative of future performance. The Fund compares its performance against the MSCI ACWI IMI equity index including dividends. Performances are shown in EUR.
